# Productivity Wherever You Need It The Most.

## Innovative Wireless Solutions.

Do you need a way to easily integrate with your existing store operations? Are you searching for products that can be managed on your wireless network? Do cables get in the way of streamlined operations?

You need the Monarch Sierra Sport2 Network Printer...it's designed to improve retail operations in several ways:

- ⇒ Assist your IS department by providing simplified software maintenance, easy diagnostics, better range and more cost effective migration.
- ⇒ Easy Internet Protocol (IP) programming, using the same powerful method used by the Internet.
- ⇒ Improve flexibility, lower costs and reduce downtime by eliminating cables from your mobile printing solution.

## Open the Door to Greater Portable Printer Value.

The Monarch Sierra Sport2 Network Printer is ready to go straight to the product! The Sierra Sport2 Network Printer is the ideal wireless solution for a variety of retail functions.

When price changes are needed, the lightweight Monarch Sierra Sport2 Network Printer can go right to the product's location. Pricing and re-ticketing are done in a snap! Because the work can be done right on the retail floor, employees remain visible and accessible to customers, improving sales and customer satisfaction.

## Advanced Design.

Wireless experts will appreciate the extra steps Monarch has taken to integrate advanced design features:

**Simplified Software Maintenance** makes it easier for your IS department to maintain. Both 802.11 and 802.11b options are available.

**Easy to Diagnose** serial interface helps isolate problems to the radio or printer.

**Better Range** from the optimized internal antenna provides improved coverage over fixed mount antennas.

**Easier Migration** because the serial interface design enables an inexpensive conversion of existing wired printers to wireless.
